

TEMPERATURE SENSOR

Temperature sensor for use with SEM 3010 devices

ST-31

- ❖ Measure indoor and outdoor temperatures
- ❖ Protective casing
- ❖ Cable length allow placement away from SEM 3010 up to 10 m.

ST-31 is universal temperature sensor suitable for measurement indoor and outdoor temperatures. It comes with RJ45 connector specialized for SEM 3010 device ST ports connectivity. It comes with fixed attached 5 meter cable.

SEM 3010 provides power supply of 15V DC necessary to ST-31 operating. Do not

use this sensor on other equipment then SEM 3010 devices because you can damage sensor and other device. Sensor readings will be monitor and logged by SEM 3010. You can analyze data with SEM Visio client software.

<i>Technical data</i>	
<i>Range</i>	-20°C (-4°F) ... +70°C (+158°F)
<i>output</i>	0..20mA current loop
<i>Interfaces</i>	RJ45 for SEM ST plug only!
<i>Power supply</i>	Integrated from SEM ST plug 15VDC
<i>Consumption</i>	30mA max
<i>Dimensions W x D x H</i>	30x25x30 mm
<i>Weight</i>	4 kg
